Michael:

Sounds good.

Will you be providing the FS for review in electronic or hardcopy?

Hope you had a nice weekend.

Thank you,

Andy,

We are going to share the FS with you guys now. Do you want to send someone by the office on Tuesday? Thanks for sending this information along. I don't think that I will need you and Jay to be at the next tour. Once I get a head count, I will let you know how many vans I will need. I will talk to my management about the public meeting on the groundwater system. I am going to advise them that we should have that meeting and that we should only treat if we find contamination. Let's also do it after Tetratex has had time to review the FS. There will likely be questions on it.

Have a great long weekend.

Michael

Jan/ Michael:

A quick thanks for taking the time to sit down with the Trust and TetraTech yesterday to discuss the site. To follow-up:

- 1) Arcadis letter to City dated November 5, 2007, attached;

- 2) Trust to sent all relevant POTW permitting information to EPA;
- 3) EPA to advise Trust on next steps re: potential further plant optimization. As discussed, a first logical step would be to utilize the former clarifier as a 30-day holding / EQ tank, perform analytical monthly and either discharge the entirety to the POTW or, if required, treat as per usual. Do we start down this path and involve the community once we have 3 - 5 months of data?
- 4) EPA to advise Trust on FS review timeline;
- 5) EPA to advise Trust re: September 10th site tour.

If I missed anything, please let me know.

Enjoy the long weekend-

Thank you,

Andrew W. Steinberg
